

Math Test#1 Review

Test on Monday, September 10

Need to know how to:

- Read place value of whole numbers- students will need to write the correct number for the words. Ex. six hundred three thousand, four hundred fifty six --> 603,456
- Add whole numbers with and without carrying
- Subtract whole numbers with and without borrowing
- Multiply whole numbers
- Deal with money – both writing it the correct way and calculating change
- Recognize key words to determine which process will be used. Ex: 'altogether' means (+) ; 'difference means (-)

Please see past worksheets and the student's math packet for practice.
